HOW COMFORTABLE ARE YOU WITH TOPIC						NAME _____
VPoor	Poor	ok	Good	Super		
						DATA TYPE
						8 primitive data types (int, char etc)
						String data type
						VARIABLES
						declaring
						assigning values
						using in expressions
						EXPRESSIONS
						operators
						type and result of operations and expressions
						precedence
						associativity
						arithmetic operators
						relational operators
						STATEMENTS
						assignment
						if, if else, if else if else,
						while
						for loop
						block statements
						print and println
						JAVA LIBRARY
						String methods
						Scanner methods
						Math methods
						METHODS
						method declaration
						methods without return values
						method arguments
						method parameter passing
						methods with return value
						FUTURE
						local variables
						argument variables
						instance variables
						static variables
						scope of variables
						visibility (private, public, protected, package)
